California Water Service Group

Investing for Life

The Stockholder

California Water Service Group (NYSE: CWT) is the second largest investor-owned water utility in the United States, providing high-quality water utility services to approximately 2 million people in 100 communities through six subsidiaries: California Water Service Company (Cal Water), Hawaii Water Service Company, Inc. (Hawaii Water), New Mexico Water Service Company (New Mexico Water), Washington Water Service Company (Washington Water), CWS Utility Services (CWSUS), and HWS Utility Services, L.L.C. (HWSUS). Cal Water, Hawaii Water, New Mexico Water, and Washington Water provide regulated water utility services, while CWSUS and HWSUS conduct the Company's non-regulated business, which includes providing billing, water quality testing, and water system operations and management services to cities and other companies.

It was a good year.

To Our Stockholders

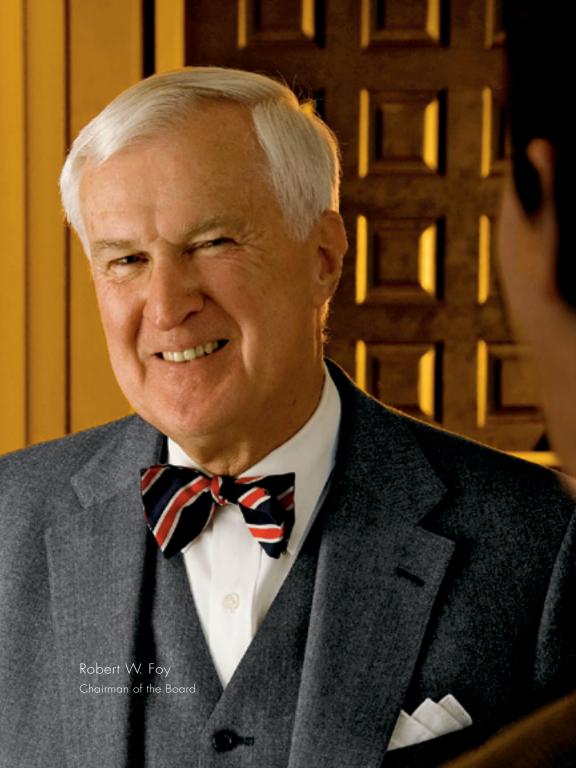

Investing for life. It's what we do when we invest in our water systems. It's what you do when you invest in California Water Service Group (NYSE: CWT).

The pipelines that connect us to the 2 million people we serve are tangible, but the intangible connection that links our customers, our employees, and our stockholders is no less real. In a fire, a homeowner relies on the firefighter who connects the hose to our hydrant. That firefighter relies on our employees, who ensure that the hydrant operates as it should. Our employees, in turn, rely on our stockholders, who make the investments that enable us to maintain and upgrade the water system that supplies that hydrant.

So what rewards do we reap by investing for life?

Our nearly 900 employees take satisfaction in knowing that they provide life's key ingredient to families in four states. Customers use our water to grow food, stay clean and healthy, protect their communities from fire, and produce a range of goods, from concrete to ink to denim. It is clear that our employees couldn't do the important work they do without the investment of our stockholders, and beyond the pride they may take in being part of providing something so essential, our stockholders have reaped consistent financial gains. In 2007, we reached several significant milestones.

2007 Financial Results

- > We recorded net income of \$31.2 million and earnings per share of \$1.50, compared to net income of \$25.6 million and earnings per share of \$1.34 for 2006.
- > Our revenues increased by 10% to \$367.1 million.
- > We increased our dividend for the 40th consecutive year.
- > We paid a dividend for the 252nd consecutive quarter.
- > Our investment in net utility plant exceeded the \$1 billion mark.
- > 10 financial analysts are now covering our company, an indication of the interest we are generating on Wall Street.

Update on Our Strategy

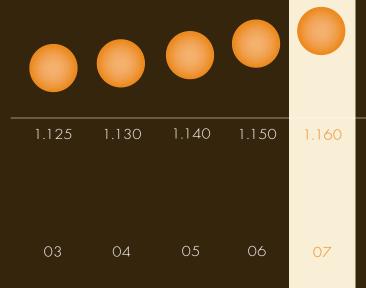

One of the reasons we deliver consistent results to stock-holders is that we don't take a "flavor of the month" approach to setting strategy. Last year, we discussed our four-pronged strategy: our focus on regulatory affairs, disciplined growth, customer service, and prudent fiscal management. In 2007, we were steadfast in our efforts to deliver results in these four key areas.

Regulatory Affairs

Perhaps most significant in 2007 was the continued progress made in implementing the California Public Utilities Commission's Water Action Plan (Plan), a document that sets the direction for policy-making and reflects best regulatory practices throughout the country.

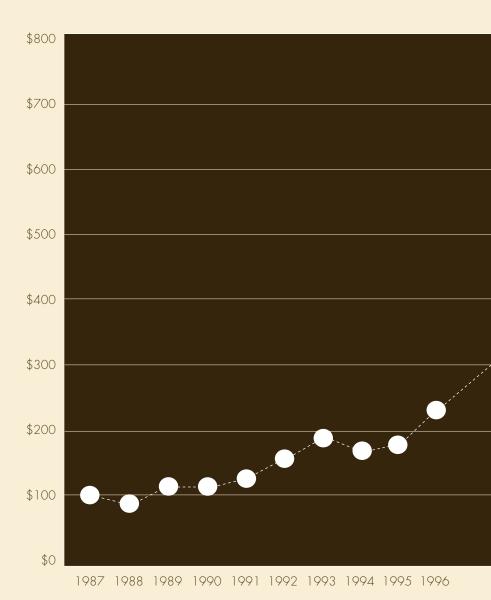

Several 2007 decisions by the California Public Utilities Commission (Commission) put Plan principles into action. The Commission's Rate Case Plan, adopted in May, allowed

Five-Year Book Value

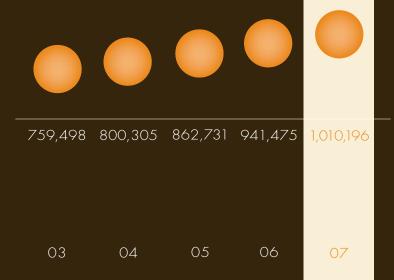

large, multi-district water utilities like California Water Service Company (Cal Water) to request recovery of increases in headquarters costs all at one time, rather than staggering collection of cost increases to coincide with each district's three-year General Rate Case cycle. This is significant because it reduces the time it takes to recover administrative expenses such as health care and benefits costs. As a result, we filed for recovery of all headquarters costs, including increased health care and benefits costs, as part of our 2007 General Rate Case. Based upon the Commission's schedule, we expect this decision to be issued in the third quarter of 2008.

In addition, the Commission issued a decision in the first phase of a proceeding on water conservation in February 2008. It contains three positive ratemaking components: 1) a Water Revenue Adjustment Mechanism (WRAM) that decouples water sales and revenues and mitigates the variations in revenues resulting from changes in customer water usage; 2) an increasing block rate structure for residential customers, resulting in higher rates for higher water usage; and 3) a Modified-Cost Balancing Account that tracks and recovers differences in costs resulting from water supply mix and price changes. We believe these changes will enhance our ability to help customers conserve our most precious natural resource.

Going forward, we will continue to work cooperatively with the Commission to implement the Water Action Plan and pursue innovative regulatory treatment that will benefit customers and stockholders. This effort will be led by Thomas F. Smegal, appointed Vice President of Regulatory Matters and Corporate Relations, effective March 2008. A professional engineer with undergraduate degrees in history and civil engineering from Stanford University and graduate work in water and energy resources at UC Berkeley, Tom brings significant experience to the position, including work at the Commission as a Utilities Engineer and Regulatory Analyst and at Cal Water as Manager of Rates. His predecessor, Francis S. (Stan) Ferraro,

Five-Year Net Utility Plant

was named Vice President, Corporate Development, a reflection of the company's commitment to pursuing suitable growth opportunities.

Disciplined Approach to Growth

Stan will lead our Business Development team in its pursuit of acquisitions that add to stockholder value and benefit our customers and communities. Our efforts paid off in 2007, as we added several new water systems. In Washington, we acquired five small systems with 461 customer connections, and entered into operations and maintenance contracts with II system owners.

We've been growing in the Aloha State as well. We currently have applications pending before the Hawaii Public Utilities Commission on our acquisition of a wastewater system serving 800 connections in the community of Pukalani on Maui, and approximately 11,000 water and wastewater connections on the Kona coast of the Big Island.

Regulated Customer Connections

----- Service areas located in the counties of Clallam, Jefferson, Kitsap, Mason, Pierce, King, San Juan, and Thurston.

Additionally, in December, we formed a non-regulated subsidiary, HWS Utility Services, L.L.C., in order to acquire the non-regulated operations and maintenance contracts from Waimea-based Island Utility Services on the island of Hawaii, which we expect to close in April 2008. We selected Terry S. Tamble, formerly manager of one of our largest districts in California, to assume leadership of Hawaii Water Service Company as General Manager, effective February 2008.

Service and Quality

Our work with regulatory agencies and efforts to grow would be fruitless without our reputation for providing excellent customer service and high-quality water. In 2007, we continued our Continuous Improvement approach to the business, which involves every single employee in developing and implementing projects that improve service or increase efficiency. We also began offering a no-fee credit card payment option to customers and arranged for Home Service USA to provide an expanded and enhanced Extended Service

Protection program, an optional program that protects residential customers if the water service line between the meter and the home breaks. Behind the scenes, we provided intensive training to all of our customer service representatives, upgraded our data center, and completed an evaluation of the security of customer data. With the California Public Utilities Commission's support, we now have the opportunity to be even more proactive about supporting customer efforts to use water efficiently. In the coming year and beyond, we intend to help our customers manage their water bills and support them in their efforts to ensure enough water for future generations.

Prudent Fiscal Management

Clearly, each of these four strategic areas is interrelated, and all contribute to our financial strength. In 2007, we were effective at controlling expenses and managing operating costs. We also streamlined and improved our internal controls to ensure compliance with all accounting and corporate

governance rules and regulations. Most importantly, we continued to invest diligently in our infrastructure. In 2007, company-funded capital expenditures were \$77 million; in 2008, we expect capital expenditures to exceed \$85 million. By building our financial strength, we provide value to stockholders; by providing value to stockholders, we attract the capital needed to maintain and upgrade our infrastructure; and by maintaining and upgrading our infrastructure, we reliably provide life's key ingredient to our customers and communities. For California Water Service Group and our stockholders, investing for life has its rewards.

Director Update

At the March 2008 meeting, the Board elected Edwin A. Guiles as Director. Ed brings a wealth of utility business leadership experience to the table, having begun his distinguished career in the energy industry 36 years ago. He currently serves as Executive Vice President of Corporate Development for San Diego-based Sempra Energy, and he previously served as

Chairman and CEO of Sempra Energy Utilities, San Diego Gas & Electric, and Southern California Gas Company. We know he will be an asset to our team and we welcome him to California Water Service Group.

In closing, it is with great sadness that we report the passing of recently retired Director David N. Kennedy, former director of the California Department of Water Resources. He was a great man, an outstanding board member, and an expert in his field, and we will miss him greatly. We dedicate this report to his memory.

On behalf of the entire Board, we thank you for your continued investment in California Water Service Group and wish you the very best in 2008.

Peter C. Nelson

Stock Transfer, Dividend Disbursing, and Reinvestment Agent American Stock Transfer & Trust Company 57 Maiden Lane New York, NY 10038 (800) 937-5449

To Transfer Stock

A change of ownership of shares (such as when stock is sold or gifted or when owners are deleted from or added to stock certificates) requires a transfer of stock. To transfer stock, the owner must complete the assignment on the back of the certificate and sign it exactly as his or her name appears on the front. This signature must be guaranteed by an eligible guarantor institution (banks, stock brokers, savings and loan associations, and credit unions with membership in approved signature medallion programs) pursuant to SEC Rule 17Ad-15. A notary's acknowledgement is not acceptable. This certificate should then be sent to American Stock Transfer & Trust Company by registered or certified mail with complete transfer instructions. Alternatively, effective January 1, 2008, California Water Service Group is participating in the Direct Registration System, which allows electronic share transactions between the stockholder's broker or dealer and American Stock Transfer & Trust Company.

Bond Registrar US Bank Trust, N.A. One California Street San Francisco, CA 94111-5402 [415] 273-4580

Annual Meeting

The Annual Meeting of Stockholders will be held on Tuesday, May 27, 2008 at 9:30 a.m. at the company's Executive Office, located at 1720 North First Street in San Jose, California. Details of the business to be transacted during the meeting will be contained in the proxy material, which will be mailed to stockholders on or about April 11, 2008.
