California Water Service Completes Water Infrastructure Upgrade to Improve Water Supply Reliability and Fire Protection in Marysville

MARYSVILLE, Calif.—California Water Service (Cal Water) recently completed a water infrastructure upgrade that will improve water supply reliability and fire protection to residents and businesses in Marysville. During the modernization, Cal Water installed 1,617 feet of new water main on A Street, between 2nd and 4th, in the south side of the city.

"Infrastructure improvements like this help Cal Water maintain a reliable water supply for both everyday and emergency needs and enable us to keep providing quality, service, and value to our customers," said Tavis Beynon, Marysville District Manager.

Installation of the new pipe took about four months to complete. Temporary asphalt has been applied until permanent paving is completed, which can be up to 30 days after project completion.

About California Water Service

California Water Service provides high-quality, reliable water utility services to about 12,500 people through approximately 3,700 service connections in Marysville, and more than 2 million people through 497,700 service connections statewide. Cal Water's purpose is to enhance the quality of life for customers and communities. To do so, it invests responsibly in water and wastewater infrastructure, sustainability initiatives, and community well-being. The company's 1,100+ employees live by a set of strong core values and share a commitment to protecting the planet, caring for people, and operating with the utmost integrity. The utility has been named one of "America's Most Responsible Companies" and the "World's Most Trustworthy Companies" by *Newsweek* and a Great Place to Work®.
