# California Water Service Water Nears Completion of Sunnyvale Infrastructure Upgrade to Improve Water Supply Reliability

SUNNYVALE, Calif.—California Water Service (Cal Water) is nearing completion of a water infrastructure upgrade that will benefit water supply reliability and fire protection in Sunnyvale.

Cal Water crews are working to finish installation of the final 1,560 feet of the 4,430 feet of new water main. Currently, crews are working on Eleanor Way, having completed installation of the first 2,870 feet of water main on S. Wolfe Road last year.

“Infrastructure improvements like these help Cal Water maintain a reliable water supply for both everyday and emergency needs and enable us to keep providing quality, service, and value to our customers,” said Dawn Smithson, Los Altos Suburban District Manager.

Work continues on Eleanor Way Monday through Friday between 7:30 a.m. and 4:30 p.m., and is expected to be completed in March. Temporary asphalt will be applied until permanent paving is completed, which can be up to 30 days after project completion. Paving will begin in mid-February.

## About California Water Service

California Water Service provides high-quality, reliable water utility services to 70,147 people through approximately 18,526 service connections in Los Altos, and more than 2 million people statewide through 497,700 service connections. Cal Water’s purpose is to enhance the quality of life for customers and communities. To do so, it invests responsibly in water and wastewater infrastructure, sustainability initiatives, and community well-being. The company’s 1,100+ employees live by a set of strong core values and share a commitment to protecting the planet, caring for people, and operating with the utmost integrity. The utility has been named one of “America’s Most Responsible Companies” and the “World’s Most Trustworthy Companies” by *Newsweek*, a Top Workplace, and a Great Place to Work®.
