
UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2012

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-13883

CALIFORNIA WATER SERVICE GROUP

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction
of incorporation or organization)

77-0448994

(I.R.S. Employer identification No.)

1720 North First Street, San Jose, CA.

(Address of principal executive offices)

95112

(Zip Code)

408-367-8200

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated Filer

Accelerated filer

Non-accelerated filer

(Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in rule 12b-2 of the Exchange Act) Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date. Common shares outstanding as of May 1, 2012 — 41,907,012

CALIFORNIA WATER SERVICE GROUP
Notes to Unaudited Condensed Consolidated Financial Statements
March 31, 2012
(Amounts in thousands, except share and per share amounts)

Note 1. Organization and Operations and Basis of Presentation

California Water Service Group (the Company) is a holding company that provides water utility and other related services in California, Washington, New Mexico and Hawaii through its wholly-owned subsidiaries. California Water Service Company (Cal Water), Washington Water Service Company (Washington Water), New Mexico Water Service Company (New Mexico Water), and Hawaii Water Service Company, Inc. (Hawaii Water) provide regulated utility services under the rules and regulations of their respective state's regulatory commissions (jointly referred to herein as the Commissions). CWS Utility Services and HWS Utility Services LLC provide non-regulated water utility and utility-related services.

The Company operates in one reportable segment, providing water and related utility services.

Basis of Presentation

The unaudited interim financial information has been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and in accordance with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X promulgated by the Securities and Exchange Commission (SEC) and therefore do not contain all of the information and footnotes required by GAAP and the SEC for annual financial statements. The condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended December 31, 2011, included in its annual report on Form 10-K as filed with the SEC on February 29, 2012.

The preparation of the Company's condensed consolidated financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the balance sheet dates and the reported amounts of revenues and expenses for the periods presented. These include, but are not limited to, estimates and assumptions used in determining the Company's regulatory asset and liability balances based upon probability assessments of regulatory recovery, revenues earned but not yet billed, asset retirement obligations, allowance for doubtful accounts, pension and other employee benefit plan liabilities, and income tax-related assets and liabilities. Actual results could differ from these estimates.

In the opinion of management, the accompanying condensed consolidated financial statements reflect all adjustments, consisting of normal recurring accruals that are necessary to provide a fair presentation of the results for the periods covered. The results for interim periods are not necessarily indicative of the results for any future period.

Due to the seasonal nature of the water business, the results for interim periods are not indicative of the results for a 12-month period. Revenue and income are generally higher in the warm, dry summer months when water usage and sales are greater. Revenue and income are lower in the winter months when cooler temperatures and rainfall curtail water usage and sales.

Effective on June 8, 2011, the Company's Certificate of Incorporation was amended to increase the number of authorized shares of the Company's common stock from 25,000,000 shares to 68,000,000 shares in connection with a 2 for 1 stock split effected as a dividend. As a result, the number of authorized shares of the Company's common stock under the equity incentive plan increased to 2,000,000 shares. The common stock par value of \$0.01 was not changed. The increased number of authorized shares and 2 for 1 stock split effective June 10, 2011 are retroactively applied to these financial statements resulting in an increase in the number of shares outstanding.

Note 2. Summary of Significant Accounting Policies

Revenue

Revenue generally includes monthly cycle customer billings for regulated water and wastewater services at rates authorized by regulatory commissions (plus an estimate for water used between the customer's last meter reading and the end of the accounting period) and billings to certain non-regulated customers at rates authorized by contract with government agencies.

The Company's regulated water and waste water revenue requirements are authorized by the Commissions in the states in which it operates. The revenue requirements are intended to provide the Company a reasonable opportunity to recover its operating costs and earn a return on investments.

[Table of Contents](#)

For metered customers, Cal Water recognizes revenue from rates which are designed and authorized by the California Public Utilities Commission (CPUC). Under the Water Revenue Adjustment Mechanism (WRAM), Cal Water records the adopted level of volumetric revenues, which would include recovery of cost of service and a return on investments, as established by the CPUC for metered accounts (adopted volumetric revenues). In addition to volumetric-based revenues, the revenue requirements approved by the CPUC include service charges, flat rate charges, and other items not subject to the WRAM. The adopted volumetric revenue considers the seasonality of consumption of water based upon historical averages. The variance between adopted volumetric revenues and actual billed volumetric revenues for metered accounts is recorded as a component of revenue with an offsetting entry to a regulatory asset or liability balancing account (tracked individually for each Cal Water district) subject to certain criteria under the accounting for regulated operations being met. The variance amount may be positive or negative and represents amounts that will be billed or refunded to customers in the future.

Cost-recovery rates are designed to permit full recovery of certain costs allowed to be recovered by the Commissions. Cost-recovery rates such as the Modified Cost Balancing Account (MCBA) provides for recovery of adopted expense levels for purchased water, purchased power and pump taxes, as established by the CPUC. In addition, cost-recovery rates include recovery of cost related to water conservation programs and certain other operation expenses adopted by the CPUC. Variances (which include the effects of changes in both rate and volume for the MCBA) between adopted and actual costs are recorded as a component of revenue, as the amount of such variances will be recovered from or refunded to our customers at a later date. There is no markup for return or profit for cost-recovery expenses and are generally recognized when expenses are incurred.

The balances in the WRAM and MCBA assets and liabilities accounts will fluctuate on a monthly basis depending upon the variance between adopted and actual results. The recovery or refund of the WRAM is netted against the MCBA over- or under-recovery for the corresponding district and is interest bearing at the current 90 day commercial

paper rate. Cal Water files with the CPUC to refund or collect the net WRAM and MCBA balances. As of December 31, 2011, \$12.9 million of net WRAM and MCBA operating revenues and \$10.5 million of associated costs were deferred because the Company concluded it would not be able to collect those amounts within 24-months of the respective reporting period. On April 19, 2012, the CPUC issued a decision to shorten the amortization periods for Cal Water's undercollected net WRAM and MCBA receivable balances for calendar years 2011, 2012, and 2013. The shortened amortization periods for 2011 undercollected balances resulted in recording \$8.8 million of deferred net WRAM and MCBA operating revenues and \$7.2 million of associated costs during the first quarter of 2012 because these amounts become collectable within 24-months. The change increased income before income taxes by \$1.6 million during the first quarter of 2012.

The change to net WRAM and MCBA deferred balances during the first quarter of 2012 are:

	Operating Revenues	Operating Costs	Income Before Income Taxes
Net WRAM and MCBA deferral as of December 31, 2011	\$ 12,864	\$ 10,492	\$ 2,372
Less: reversal of prior year deferral during the first quarter of 2012	(8,846)	(7,215)	(1,631)
Add: net WRAM and MCBA deferral the first quarter of 2012	110	90	20
Net amount recorded during the first quarter of 2012	(8,736)	(7,125)	(1,611)
Net WRAM and MCBA deferral as of March 31, 2012	<u>\$ 4,128</u>	<u>\$ 3,367</u>	<u>\$ 761</u>

The deferred net WRAM and MCBA operating revenue and associated costs were determined using forecasts of rate payer consumption trends in future reporting periods and the timing of when the CPUC will authorize Cal Water's filings to recover the undercollected balances. The deferred revenue and associated cost amounts will be recorded in future periods when the Company concludes it will be able to collect those amounts within 24-months of the respective reporting period.

7

[Table of Contents](#)

The net WRAM and MCBA under- or overcollected balances are:

	March 31, 2012	December 31, 2011
Net short-term receivable	\$ 24,842	\$ 19,357
Net long-term receivable	25,897	30,268
Total receivable	<u>\$ 50,739</u>	<u>\$ 49,625</u>
Net short-term payable	\$ 4	\$ 543
Net long-term payable	1,558	145
Total payable	<u>\$ 1,562</u>	<u>\$ 688</u>

Flat rate customers are billed in advance at the beginning of the service period. The revenue is prorated so that the portion of revenue applicable to the current period is included in that period's revenue, with the balance recorded as unearned revenue on the balance sheet and recognized as revenue when earned in the subsequent accounting period. Unearned revenue liability was \$1.9 million as of March 31, 2012 and December 31, 2011. This liability is included in "accrued expenses and other liabilities" on the condensed consolidated balance sheets.

Note 3. Stock-based Compensation

Equity Incentive Plan

The Company's equity incentive plan was approved by stockholders on April 27, 2005. The Company is authorized to issue awards up to 2,000,000 shares of common stock. During the three months ended March 31, 2012 and 2011, the Company granted annual Restricted Stock Awards (RSAs) of 89,980 and 85,426 shares, respectively, of common stock to officers and directors of the Company and no RSAs were cancelled. Employee RSAs vest over 48-months, while director RSAs vest at the end of 12-months. During the first three months of 2012 and 2011, the shares granted were valued at \$17.98 and \$17.44 per share, respectively, based upon the fair market value of the Company's common stock on the date of grant.

The Company has recorded compensation costs for the RSAs in Operating Expense in the amount of \$0.3 million for the three months ended March 31, 2012 and March 31, 2011.

Note 4. Earnings Per Share Calculations

The computations of basic and diluted earnings per share are noted below. Basic earnings per share are computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts were exercised or converted into common stock. RSAs are included in the common shares outstanding because the shares have all the same voting and dividend rights as issued and unrestricted common stock. The Company's 2 for 1 stock split has been adjusted retroactively for all periods presented.

All RSAs are dilutive and the dilutive effect is shown in the table below.

	Three Months Ended March 31	
	2012	2011
Net income available to common stockholders	\$ 1,085	\$ 2,719
Weighted average common shares, basic	41,842	41,696
Dilutive common stock options (treasury method)	—	16
Shares used for dilutive computation	<u>41,842</u>	<u>41,712</u>
Net income per share - basic	<u>\$ 0.03</u>	<u>\$ 0.07</u>
Net income per share - diluted	<u>\$ 0.03</u>	<u>\$ 0.07</u>

8

[Table of Contents](#)

Note 5. Pension Plan and Other Postretirement Benefits

The Company provides a qualified, defined-benefit, non-contributory pension plan for substantially all employees. The Company makes annual contributions to fund the amounts accrued for the qualified pension plan. The Company also maintains an unfunded, non-qualified, supplemental executive retirement plan. The costs of the plans are

charged to expense or are capitalized in utility plant as appropriate.

The Company offers medical, dental, vision, and life insurance benefits for retirees and their spouses and dependents. Participants are required to pay a premium, which offsets a portion of the cost.

Cash payments by the Company related to pension plans and other postretirement benefit plans were \$6.0 million for the three months ended March 31, 2012. The Company did not make cash contributions to the pension and other postretirement benefit plans during the three months ended March 31, 2011. The 2012 estimated cash contributions to the pension plans is \$36.5 million and to the other postretirement benefit plans is \$8.8 million.

The following table lists components of net periodic benefit costs for the pension plans and other postretirement benefits. The data listed under "pension plan" includes the qualified pension plan and the non-qualified supplemental executive retirement plan. The data listed under "other benefits" is for all other postretirement benefits.

	Three Months Ended March 31			
	Pension Plan		Other Benefits	
	2012	2011	2012	2011
Service cost	\$ 4,016	\$ 3,141	\$ 1,417	\$ 979
Interest cost	3,779	3,742	967	833
Expected return on plan assets	(2,893)	(2,244)	(468)	(341)
Recognized net initial APBO (1)	N/A	N/A	69	69
Amortization of prior service cost	1,571	1,580	29	29
Recognized net actuarial loss	1,926	1,079	764	425
Net periodic benefit cost	\$ 8,399	\$ 7,298	\$ 2,778	\$ 1,994

(1) APBO - Accumulated postretirement benefit obligation

Note 6. Short-term and Long-term Borrowings

On June 29, 2011, the Company and Cal Water entered into Syndicated Credit Agreements, which provide for unsecured revolving credit facilities of up to an initial aggregate amount of \$400 million. The Syndicated Credit Facilities amend, expand, and replace the Company's and its subsidiaries' existing credit facilities originally entered into on October 27, 2009. The new credit facilities extended the terms until June 29, 2016, increased the Company's and Cal Water's unsecured revolving lines of credit, and lowered interest rates and fees. The Company and subsidiaries which it designates may borrow up to \$100 million under the Company's revolving credit facility. Cal Water may borrow up to \$300 million under its revolving credit facility; however, all borrowings need to be repaid within 12-months unless otherwise authorized by the CPUC. The proceeds from the revolving credit facilities may be used for working capital purposes, including the short-term financing of capital projects. The base loan rate may vary from LIBOR plus 72.5 basis points to LIBOR plus 95 basis points, depending on the Company's total capitalization ratio. Likewise, the unused commitment fee may vary from 8 basis points to 12.5 basis points based on the same ratio.

Both short-term unsecured credit agreements contain affirmative and negative covenants and events of default customary for credit facilities of this type including, among other things, limitations and prohibitions relating to additional indebtedness, liens, mergers, and asset sales. Also, these unsecured credit agreements contain financial covenants governing the Company and its subsidiaries' consolidated total capitalization ratio and interest coverage ratio. As of March 31, 2012, the Company and Cal Water have met all borrowing covenants for both credit agreements.

As of March 31, 2012 and December 31, 2011, the outstanding borrowings on the Company lines of credit were \$50.8 million and \$47.1 million, respectively, and there were no borrowings on the Cal Water lines of credit for both periods. For the three months ended March 31, 2012, the average borrowing rate was 1.6% compared to 2.9% for the same period last year.

Note 7. Income Taxes

The Company accounts for income taxes using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Measurement of the deferred tax assets and liabilities is at enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the period that includes the enactment date.

[Table of Contents](#)

Effective January 1, 2012, the federal income tax repairs deduction for qualified tangible property is mandatory. The repairs deduction is estimated to significantly reduce the Company's 2012 federal income tax payments. The new deduction accelerates qualified tangible property deductions for property placed into service during 2012 and prior years. The repairs deduction is also estimated to eliminate the Company's 2012 federal qualified U.S. production activities deductions (QPAD) which is estimated to increase the effective income tax rate for 2012 compared to the prior year.

The California Franchise Tax Board (FTB) is auditing the Company's 2008 and 2009 California income tax returns. It is uncertain when the FTB will complete its audit. The Company believes that the final resolution of the FTB audit will not have a material adverse impact on its financial condition or results of operations. The Company is not under audit by any other jurisdiction.

Note 8. Regulatory Assets and Liabilities

During 2011, the CPUC issued a decision regarding the \$34.2 million of litigation proceeds previously received by Cal Water during 2008 which is being used to replace infrastructure damaged by the gasoline additive Methyl tert-butyl ether (MTBE). The decision requires use of these proceeds for costs incurred as a result of MTBE contamination with any related benefits to be provided to Cal Water customers. Such usage includes transfer of the amount to contributions in aid of construction (CIAC) for remediation or replacement project costs once complete. Usage of the proceeds is reported to the CPUC through an Advice Letter or General Rate Case filing. As of December 31, 2011, \$16.7 million of the proceeds was recorded as CIAC. Cal Water did not use any of the proceeds to replace damaged infrastructure during the first quarter of 2012. The remaining balance of \$16.4 million is recorded as other long-term liabilities.

During 2011, Cal Water added balancing accounts for its pension plans and conservation program. Both balancing account effective dates were January 1, 2011. The pension plans balancing account is a two-way balancing account that tracks the differences between actual expenses and adopted rate recovery which will result in either a regulatory asset or liability. The conservation program is a one-way balancing account that tracks the differences between actual expenses and adopted rate recovery which may result in a regulatory liability if actual conservation expenses are less than adopted over the three year period ending December 31, 2013. As of March 31, 2012 and December 31, 2011, there was a regulatory liability of \$5.6 million and \$6.3 million, respectively, for both balancing accounts combined.

Note 9. Commitment and Contingencies

Commitments

The Company has significant commitments to lease certain office spaces and water systems and to purchase water from water wholesalers. These commitments are described in Form 10-K for the year ended December 31, 2011. As of March 31, 2012, there were no significant changes from December 31, 2011.

Contingencies

Groundwater Contamination

The Company has undertaken litigation against third parties to recover past and future costs related to ground water contamination in our service areas. The cost of litigation is expensed as incurred and any settlement is first offset against such costs. The Commission general policy require all proceeds from contamination litigation to be used first to pay transactional expenses, then to make ratepayers whole for water treatment costs to comply with the Commission's water quality standards. The Commission allows for a risk-based consideration of contamination proceeds which exceed the costs of the remediation described above and may result in some sharing of proceeds with the shareholder, determined on a case by case basis. The Commission has authorized various memorandum accounts that allow the Company to track significant litigation costs to request recovery of these costs in future filings and uses of proceeds to comply with Commission's general policy.

Other Legal Matters

From time to time, the Company is involved in various disputes and litigation matters that arise in the ordinary course of business. The status of each significant matter is reviewed and assessed for potential financial exposure. If the potential loss from any claim or legal proceeding is considered probable and the amount of the range of loss can be estimated, a liability is accrued for the estimated loss in accordance with the accounting standards for contingencies. Legal proceedings are subject to uncertainties, and

10

Table of Contents

the outcomes are difficult to predict. Because of such uncertainties, accruals are based on the best information available at the time. While the outcome of these disputes and litigation matters cannot be predicted with any certainty, management does not believe when taking into account existing reserves the ultimate resolution of these matters will materially affect the Company's financial position, results of operations, or cash flows.

Note 10. Fair Value of Financial Assets and Liabilities

The accounting guidance for fair value measurements and disclosures (Accounting Standards Update No. 2011-04 and Accounting Standards Codification No. 270-10-45-19, effective January 1, 2012), provides a single definition of fair value and requires certain disclosures about assets and liabilities measured at fair value. A hierarchical framework for disclosing the observability of the inputs utilized in measuring assets and liabilities at fair value is established by this guidance. The three levels in the hierarchy are as follows:

- Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. The types of assets and liabilities included in Level 1 are highly liquid and actively traded instruments with quoted prices.
- Level 2 - Pricing inputs are other than quoted prices inactive markets, but are either directly or indirectly observable as of the reporting date. The types of assets and liabilities included in Level 2 are typically either comparable to actively traded securities or contracts, or priced with discounted cash flow or option pricing models using highly observable inputs.
- Level 3 - Significant inputs to pricing have little or no observability as of the reporting date. The types of assets and liabilities included in Level 3 are those valued with models requiring significant management judgment or estimation.

Specific valuation methods include the following:

Cash equivalents, accounts receivable and accounts payable carrying amounts approximated the fair value because of the short-term maturity of the instruments.

Long-term debt fair values were estimated using the published quoted market price, if available, or the discounted cash flow analysis, based on the current rates available using a risk-free rate (a U.S. Treasury securities yield curve) plus a risk premium of 1.19%.

Advances for construction fair values were estimated using broker quotes from companies that frequently purchase these investments.

	March 31, 2012				
	Cost	Fair Value			Total
		Level 1	Level 2	Level 3	
Long -term debt, including current maturities	\$ 487,734	\$ —	\$ 592,256	\$ —	\$ 592,256
Advances for construction	\$ 185,829	\$ —	\$ 70,862	\$ —	\$ 70,862
Total	\$ 673,563	\$ —	\$ 663,118	\$ —	\$ 663,118

	December 31, 2011				
	Cost	Fair Value			Total
		Level 1	Level 2	Level 3	
Long -term debt, including current maturities	\$ 488,165	\$ —	\$ 625,202	\$ —	\$ 625,202

Total	\$ 675,443	\$ —	\$ 695,161	\$ —	\$ 695,161

Note 11. Subsequent Events

On April 19, 2012, the CPUC issued a decision to shorten the amortization periods for Cal Water's undercollected net WRAM and MCBA receivable balances for calendar years 2011, 2012, and 2013. As a result of this decision, most of Cal Water's 2011, 2012, and 2013 net undercollected WRAM and MCBA receivable balances will be amortized over 12 and 18-month periods. In addition, the decision authorized Cal Water to bill and collect all undercollected balances at the end of each calendar year. As of December 31, 2011, \$12.9 million of net WRAM and MCBA operating revenues and \$10.5 million of associated costs were deferred. The CPUC decision to shorten the amortization periods resulted in the recording of an additional \$8.7 million of operating revenues and \$7.1 million of associated costs during the first quarter of 2012 because these balances will be collected within 24-months using the new amortization periods. Calendar year 2014 and future year amortization periods will be determined during the 2012 General Rate Case expected to be filed in 2013.

Note 12. Condensed Consolidating Financial Statements (unaudited)

On April 17, 2009, Cal Water issued \$100 million aggregate principal amount of 5.875% First Mortgage Bonds due 2019, and on November 17, 2010, Cal Water issued \$100 million aggregate principal amount of 5.500% First Mortgage Bonds due 2040, all of which are fully and unconditionally guaranteed by the Company.

The following tables present the condensed consolidating balance sheets as of March 31, 2012 and December 31, 2011, the condensed consolidating statements of income for the three months ended March 31, 2012 and 2011 and the condensed consolidating statements of cash flow for the three months ended March 31, 2012 and 2011 of (i) California Water Service Group, the guarantor of the first mortgage bonds and the parent company; (ii) California Water Service Company, the issuer of the first mortgage bonds and a wholly-owned consolidated subsidiary of California Water Service Group; and (iii) the other wholly-owned consolidated subsidiaries of California Water Service Group.

18

Subsequent to the issuance of the March 31, 2011 unaudited financial statements management determined that within the condensed consolidating statement of cash flows the Company presented affiliate advances as operating activities. These intercompany payables and receivables transactions between the Company, Cal Water, and the other 100% owned subsidiaries have been corrected in the above condensed consolidating statement of cash flows for the three months ended March 31, 2011 to be presented within investing and financing activities. This correction has no impact on the consolidated statement of cash flows for the three months ended March 31, 2011. The corrections are summarized as follows:

CONDENSED CONSOLIDATING STATEMENT OF CASH FLOWS

Item 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
 FINANCIAL CONDITION AND RESULTS OF OPERATIONS
 (Dollar amounts in thousands, except where otherwise noted and per share amounts)

FORWARD LOOKING STATEMENTS

This quarterly report, including all documents incorporated by reference, contains forward-looking statements within the meaning established by the Private Securities Litigation Reform Act of 1995 (Act). Forward-looking statements in this quarterly report are based on currently available information, expectations, estimates, assumptions

and projections, and our management's beliefs, assumptions, judgments and expectations about us, the water utility industry and general economic conditions. These statements are not statements of historical fact. When used in our documents, statements that are not historical in nature, including words like "expects," "intends," "plans," "believes," "may," "estimates," "assumes," "anticipates," "projects," "predicts," "forecasts," "should," "seeks," or variations of these words or similar expressions are intended to identify forward-looking statements. The forward-looking statements are not guarantees of future performance. They are based on numerous assumptions that we believe are reasonable, but they are open to a wide range of uncertainties and business risks. Consequently, actual results may vary materially from what is contained in a forward-looking statement.

Factors which may cause actual results to be different than those expected or anticipated include, but are not limited to:

- governmental and regulatory commissions' decisions, including decisions on proper disposition of property;
- changes in regulatory commissions' policies and procedures;
- the timeliness of regulatory commissions' actions concerning rate relief;
- changes in the capital markets and access to sufficient capital on satisfactory terms;
- new legislation;
- changes in accounting valuations and estimates;
- changes in accounting treatment for regulated companies, including adoption of International Financial Reporting Standards, if required;
- electric power interruptions;
- increases in suppliers' prices and the availability of supplies including water and power;
- fluctuations in interest rates;
- changes in environmental compliance and water quality requirements;
- acquisitions and the ability to successfully integrate acquired companies;
- the ability to successfully implement business plans;
- civil disturbances or terrorist threats or acts, or apprehension about the possible future occurrences of acts of this type;
- the involvement of the United States in war or other hostilities;
- our ability to attract and retain qualified employees;
- labor relations matters as we negotiate with the unions;
- federal health care law changes that could result in increases to Company health care costs and additional income tax expenses in future years;
- changes in federal and state income tax regulations and treatment of such by regulatory commissions;

[Table of Contents](#)

- implementation of new information technology systems;
- changes in operations that result in an impairment to acquisition goodwill;
- restrictive covenants in or changes to the credit ratings on current or future debt that could increase financing costs or affect the ability to borrow, make payments on debt, or pay dividends;
- general economic conditions, including changes in customer growth patterns and our ability to collect billed revenue from customers;
- changes in customer water use patterns and the effects of conservation;
- the impact of weather on water sales and operating results;
- the ability to satisfy requirements related to the Sarbanes-Oxley and Dodd Frank Acts and other regulations on internal controls; and
- the risks set forth in "Risk Factors" included in the Company's Annual Report on Form 10-K.

In light of these risks, uncertainties and assumptions, investors are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date of this quarterly report or as of the date of any document incorporated by reference in this report, as applicable. When considering forward-looking statements, investors should keep in mind the cautionary statements in this quarterly report and the documents incorporated by reference. We are not under any obligation, and we expressly disclaim any obligation, to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

CRITICAL ACCOUNTING POLICIES

We maintain our accounting records in accordance with accounting principles generally accepted in the United States of America (GAAP) and as directed by the Commissions to which our operations are subject. The process of preparing financial statements in accordance with GAAP requires the use of estimates on the part of management. The estimates used by management are based on historic experience and an understanding of current facts and circumstances. Management believes that the following accounting policies are critical because they involve a higher degree of complexity and judgment, and can have a material impact on our results of operations, financial condition, and cash flows of the business. These policies and their key characteristics are discussed in detail in the 2011 Form 10-K. They include:

- **revenue recognition and the water revenue adjustment mechanism;**

- **modified cost balancing accounts;**
- **expense balancing and memorandum accounts;**
- **regulatory utility accounting;**
- **income taxes;**
- **pension benefits;**
- **workers' compensation and other claims;**
- **goodwill accounting and evaluation for impairment; and**
- **contingencies.**

For the three-month period ended March 31, 2012, there were no changes in the methodology for computing critical accounting estimates, no additional accounting estimates met the standards for critical accounting policies, and there were no material changes to the important assumptions underlying the critical accounting estimates.

[Table of Contents](#)

**RESULTS OF FIRST QUARTER 2012 OPERATIONS COMPARED TO
FIRST QUARTER 2011 OPERATIONS**
Amounts in thousands except share data

Overview

Net income for the three month period ended March 31, 2012, was \$1.1 million, or \$0.03 per diluted common share compared to net income of \$2.7 million or \$0.07 per diluted common share for the three month period ended March 31, 2011. The decrease in net income during the first quarter of 2012 was mostly due to a nonrecurring income tax adjustment recorded during the first quarter of 2011 that reduced income taxes by \$1.6 million. The additional WRAM and MCBA net income resulting from the reversal of deferred amounts as of December 31, 2011, and rate increases during the first quarter of 2012 were partially offset by higher operating expenses. Other income increased \$0.7 million mostly due to an unrealized gain on our benefit plan insurance investments during the first quarter of 2012 compared to first quarter 2011.

Operating Revenue

Operating revenue increased \$18.6 million or 19% to \$116.7 million in the first quarter of 2012. As disclosed in the following table, the increase was due to increases in usage (includes an additional \$8.8 million of net WRAM and MCBA operating revenues that were deferred as of December 31, 2011) and rates.

The factors that impacted the operating revenue for the first quarter of 2012 compared to 2011 are as follows:

Usage (includes WRAM and MCBA deferral adjustment)	\$	16,522
Rate increases		5,690
Net change due to actual versus adopted results and other		<u>(3,612)</u>
Net operating revenue increase	\$	<u>18,600</u>

The net change due to actual versus adopted results, usage, and other in the above table refers primarily to the revenue impact year over year of the change in revenue recognized by the WRAM and MCBA. The WRAM is impacted by changes in consumption patterns from our historical trends as well as an increase in conservation efforts. The MCBA, which records the differences in production costs from the adopted costs, is recorded as an element of revenue as it represents pass through costs which are billed to customers. The MCBA is impacted by changes in total production quantities, the production mix of the source of water, the price paid for purchased water and power, and the amount of pump taxes paid.

The components of the rate increases are as follows:

Purchased water offset increases	\$	3,832
Step rate increases		1,386
General rate case (GRC) increases		271
Other		201
Total increase in rates	\$	<u>5,690</u>

Total Operating Expenses

Total operating expenses were \$110.1 million for the first quarter of 2012, versus \$88.2 million for the same period in 2011, a 25% increase.

Water production expense consists of purchased water, purchased power, and pump taxes. It represents the largest component of total operating expenses, accounting for approximately 35% of total operating expenses in the first quarter of 2012. Water production expenses increased 22% compared to the same period last year mostly due to increased costs for purchased water. Our wholly-owned operating subsidiaries, Washington Water, New Mexico Water, and Hawaii Water obtain all of their water supply from wells.

[Table of Contents](#)

Sources of water as a percent of total water production are listed in the following table:

	<u>Three Months Ended March 31</u>	
	<u>2012</u>	<u>2011</u>
Well production	45%	43%
Purchased	52%	50%

Surface	3 %	7 %
Total	100 %	100 %

The components of water production costs are shown in the table below:

	Three Months Ended March 31		
	2012	2011	Change
Purchased water	\$ 31,856	\$ 25,531	\$ 6,325
Purchased power	5,141	4,851	290
Pump taxes	1,955	1,576	379
Total	\$ 38,952	\$ 31,958	\$ 6,994

Purchased water costs increased primarily due to price increases from water wholesalers. Total water production measured in acre feet increased by 7,609 acre feet for the first quarter of 2012, or 12% over the first quarter of 2011.

Administrative and general expense and other operations expense increased 33% to \$46.8 million. The primary reason for the increase was an additional \$7.2 million of net WRAM and MCBA expenses resulting from the reversal of amounts deferred as of December 31, 2011, increases in employee benefits and wage costs, and increases in conservation program expenses during the first quarter of 2012. Wage increases became effective January 1, 2012. At March 31, 2012, there were 1,124 employees and at March 31, 2011, there were 1,125 employees.

Maintenance expense increased by 11% to \$5.8 million in the first quarter of 2012 compared to \$5.2 million in the first quarter of 2011, due to an increase in main water treatment facilities and transmission and distribution mains repairs.

Depreciation and amortization expense increased \$1.4 million, or 11%, mostly due to 2011 capital additions.

Federal and state income taxes charged to operating expenses increased \$1.3 million, in the first quarter of 2012 mostly because of a 2011 nonrecurring income tax adjustment which reduced income taxes \$1.6 million during the first quarter of 2011. We expect the effective tax rate to be between 38% and 42% for fiscal year 2012.

Other Income and Expense

Non-regulated revenue, net of related expenses reflected an unrealized gain on our benefit plan insurance investments of \$1.7 million for the first quarter of 2012, compared to an unrealized gain of \$0.5 million in the same period last year, which was an increase of \$1.2 million.

Interest Expense

Net interest expense, net of interest capitalized, decreased \$1.0 million, or 13%, to \$6.7 million for the first quarter of 2012 compared to the same period last year. The decrease was mostly due to an increase in capitalized interest charged to construction projects, a reduction in line-of-credit fees during the first quarter of 2012, and the end of temporary interest rate balancing account (TIRBA) interest as of December 31, 2011.

REGULATORY MATTERS

The state regulatory commissions have plenary powers setting rates and operating standards. As such, state commission decisions significantly impact Cal Water's revenues, earnings, and cash flows. The amounts discussed herein are generally annual amounts, unless specifically stated, and the financial impact to recorded revenue is expected to occur over a 12-month period from the effective date of the decision. In California, water utilities are required to make several different types of filings. Most filings result in rate changes that remain in place until the next General Rate Case (GRC). As explained below, surcharges and surcredits are used to recover balancing and memorandum accounts as well as general rate case interim rate catch-up. Surcharges and surcredits are temporary rate changes, which have specific time frames for recovery.

Table of Contents

GRCs, escalation rate increase filings, and offset filings change rates to amounts that will remain in effect until the next GRC. The CPUC follows a rate case plan, which requires Cal Water to file a GRC for each of its regulated operating districts every three years. In a GRC proceeding, the CPUC not only considers the utility's rate setting requests, but may also consider other issues that affect the utility's rates and operations. The CPUC is generally required to issue its GRC decision prior to the first day of the test year or authorize interim rates. In accordance with the rate case plan, the Commission issued a decision on Cal Water's 2009 general rate case filing in the fourth quarter of 2010 with rates effective on January 1, 2011. Cal Water expects to file its next GRC on July 2, 2012, which will be applicable to all of its California Districts. Any rate change as a result of that filing is expected to be effective on January 1, 2014.

Between GRC filings utilities may file escalation rate increases, which allow the utility to recover cost increases, primarily from inflation and incremental investment, during the second and third years of the rate case cycle. However, escalation rate increases are subject to a weather-normalized earnings test on a district-by-district basis. Under the earnings test, the CPUC may reduce the escalation rate increase if, in the most recent 12-month period, this earnings test reflects earnings in excess of authorized for that district.

In addition, California water utilities are entitled to make offset filings. Offset filings may be filed to adjust revenues for construction projects authorized in GRCs when the plant is placed in service or for rate changes charged to the Company for purchased water, purchased power, and pump taxes (referred to as "offsettable expenses"). Such rate changes approved in offset filings remain in effect until the next GRC is approved.

The Water Revenue Adjustment Mechanism (WRAM) and Modified Cost Balancing Account (MCBA) are required by the CPUC to encourage Cal Water to promote lower water consumption levels with water conservation programs. In order to maintain revenue neutrality, the CPUC de-coupled Cal Water's revenue requirement from ratepayer usage with the WRAM/MCBA. Under the WRAM/MCBA, Cal Water recovers the full quantity revenue amounts authorized by the CPUC by using advice letter filings for any unbilled quantity revenue amounts or refunds for overcollection, regardless of customer usage volumes.

Surcharges and surcredits advice letters to amortize balances in the WRAM and MCBA accounts are filed between February and April of each year based on the district balances for the last calendar year. Based on current CPUC interpretations, surcharges are generally amortized over 12 or 18 months. The WRAM and MCBA amounts are cumulative, so if they are not amortized in a given calendar year, the balance will be carried forward and included with the following year balance.

2012 Regulatory Activity

Changes in CPUC's Procedures for WRAM Amortization

Cal Water, along with four other investor-owned water utilities filed a joint application to change the amortization periods to 24 months or less. The CPUC issued a proposed decision regarding the amortization periods on March 23, 2012 and a final decision on April 19, 2012. The final decision shortened the amortization for

undercollected balances for calendar years 2011, 2012, and 2013. Also, the decision authorized Cal Water to bill and collect all year-end undercollected balances. Cal Water anticipates most of the undercollected balances during calendar years 2011, 2012, and 2013 will be collected using 12 and 18- month amortization periods. The collection periods for calendar year 2014 and future years will be determined during the 2012 GRC.

Remaining Balances from Previously Authorized Balancing Accounts Recoveries/Refunds

Prior to the adoption of the MCBA on July 1, 2008, the CPUC required incremental cost balancing accounts (ICBA) memorandum and balancing accounts. The ICBA refunds and billings will be completed during calendar year 2012. As of March 31, 2012, a \$0.7 million regulatory asset and a \$0.3 million regulatory liability were recorded for the remaining unbilled or un-refunded balances.

[Table of Contents](#)

California Cost of Capital Applications

Cal Water along with the three other large water utilities in California filed an application with the CPUC in May of 2011 to review its cost of capital for 2012 through 2014. The Company and the other applicant companies proposed a settlement with the Division of Ratepayer Advocates which is now pending before the CPUC. The settlement would have the CPUC adopt a 9.99% return on equity and 53.4% equity capital structure for rate setting purposes. It would also continue the Water Cost of Capital Mechanism, which would adjust allowed equity returns if there is a large change in the Moody AA utility bond index. The parties anticipate a favorable decision approving the settlement during the second quarter of 2012. Because this proceeding was scheduled to set the authorized rate of return for the Company's investment starting on January 1, 2012 and a decision had not been issued, the CPUC required Cal Water to file an advice letter to establish a Cost of Capital interim rate memorandum account. This will serve as a mechanism to true up rates to reflect the final decision in this proceeding.

2009 California GRC Decision

On July 2, 2009, Cal Water filed its 2009 GRC application covering all district and general office revenue requirements. The GRC application requested an increase of \$70.6 million or 16.75% in rates for 2011, \$24.8 million or 5.04% in rates for 2012 and \$24.8 million or 4.79% in rates for 2013. On December 2, 2010, the CPUC issued decision 10-12-017, which approved a settlement between Cal Water, the Division of Ratepayer Advocates, and several intervenors representing the interests of individual district customers. This decision allows for revenue increases of \$25.4 million or 5.6% in 2011. Cal Water is also allowed to file for increases of \$9.6 million or 2.0% for 2012, and \$9.0 million or 2.0% for 2013 subject to adjustment for indexed inflation and contingent upon passing a weather normalized earnings test. This decision also allows for offset increases after construction of 77 large capital projects in various operating districts.

In addition, the Company was authorized to make a deviation from its escalation expense and exclude employee health care, retiree health insurance, and conservation expenses from its escalation filings in 2012 and 2013. Instead for these three significant expense items, the CPUC has enumerated fixed three-year budgets for these expenses. It is anticipated that the budgets for these areas will more closely align with the actual expenses now that this change has been initiated.

The CPUC also authorized a Pension Balancing Account to track the difference between authorized pension contributions included in rates and the costs actually incurred. It is anticipated that this account will allow Cal Water to reduce some of the volatility it experiences in regard to the recovery of these costs from customers.

The Company was also authorized to combine the rates and tariffs of the South San Francisco and the Mid Peninsula Districts, located on the San Francisco peninsula, into a single ratemaking area in 2011. This new ratemaking area is known as the Bayshore District. Previously, the two separate districts had been operated out of a combined location.

Due to the transition between a phased rate case and a total company filing, the CPUC delayed the rate cases of 16 Cal Water districts. However, to compensate for this delay, the CPUC authorized interim rates from the authorized effective date under the old rate case plan. The difference between revenue requirements that were effective in the interim period and those calculated based on a final determination in the 2009 general rate case filing totaled \$6.7 million and is being recovered as customer surcharges over a three-year period. During 2011, \$3.8 million was billed and recorded as revenue. The remaining balance of \$2.9 million is expected to be recovered during 2012 and 2013, and will be recorded as revenue when billed. Overcollected amounts from ratepayers will be recorded as regulatory liability during the reporting period in which it occurs. As of March 31, 2012, the overcollected amount of \$0.5 million was recorded as a regulatory liability.

In January 2012, Cal Water implemented escalation rate increases in 17 districts. The annual revenue increase from these increases is \$8.7 million.

Low Income Ratepayer Assistance Program

Cal Water currently administers a Low Income Ratepayer Assistance Program in accordance with decision D.06-11-053. This program provides qualifying low income customers with a 50% discount on their service charge (up to a maximum of \$12 per month). It imposes a surcharge on non-qualifying customers of \$0.01 per hundred cubic feet of monthly water consumption for metered customers and between \$0.24 and \$0.41 per flat rate service per month. Due to a successful enrollment of over 47,000 customers, this account had accumulated an under collection of approximately \$6.2 million as of March 31, 2012, and is recorded in non-current regulatory assets. During the first quarter of 2012, Cal Water filed a petition to modify D.06-11-053 to 1) increase surcharges to balance program expenses and revenues, 2) amortize the current balance in the program, and 3) establish an annual adjustment mechanism to reduce the potential for large balances in the future. There has not been any resolution on this petition as of the date of this report.

[Table of Contents](#)

2010 Ka'anapali (Hawaii) GRC Filing

On December 30, 2010, Hawaii Water filed its 2010 GRC application for the Ka'anapali Service Area. The Hawaii Public Utilities Commission (HPUC) requires a separate rate application for all service areas and uses a limited future test year. The Ka'anapali GRC requested additional revenue of \$1.5 million or an increase of 38.2% over the prior year. HWSC and the Consumer Advocate of the HPUC reached a tentative settlement on this rate increase. On January 11, 2012, the HPUC issued a Decision and Order approving the stipulated settlement. This resulted in a \$1.2 million, or 30.8%, annual revenue increase that was effective March 2012.

2011 Pukalani (Hawaii) GRC Filing

In August 2011, HWSC filed a general rate case for the Pukalani wastewater system requesting \$1.3 million in additional annual revenues. HWSC began settlement negotiations with the Consumer Advocate in early 2012. At this time, HWSC cannot determine timing or final amount of rate relief this filing will generate.

2011 Washington Water GRC Filing

In 2011, Washington Water filed a general rate case for its operations. It requested a \$1.7 million, or 21.8%, increase in revenue. On January 26, 2012, the Washington

Utilities and Transportation Commission approved a \$1.6 million, or 20.0%, increase effective February 2012.

Federal Income Tax Bonus Depreciation

In 2011, Cal Water filed for and received approval to track the benefits from federal income tax accelerated depreciation in a memorandum account due to the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010. Additional federal income tax deductions for assets placed in service after September 8, 2010 and before December 31, 2011 was \$6.6 million for 2010 and estimated at \$10.5 million for 2011. The CPUC will determine the disposition of amounts recorded in the memorandum account in Cal Water's next GRC.

Request for MTBE regulatory treatment

The CPUC in its Decision (D.) 10-10-018 issued rules for treating contamination proceeds generally. Subsequently, the CPUC's D.11-03-043 resolved Cal Water's separate application for treatment of MTBE proceeds by ordering continued tracking of the proceeds and expenditures until litigation and remediation are both complete. The new rules allow Cal Water to file an advice letter to move proceeds from this tracking account into Contributions in Aid of Construction ("CIAC") when remediation or replacement projects are complete. Cal Water has completed several such projects totaling \$16.7 million. While the advice letters have not been filed for some of these projects, Cal Water believes it is probable the CPUC will treat the invested amounts as CIAC when the advice letters are filed. The Company has reclassified \$16.7 million from regulatory and other liabilities to CIAC during 2011. Project costs totaling \$9.1 million were treated as CIAC in setting rates in the 2009 General Rate Case effective January 1, 2011, so there is no rate impact for this reclassification. For projects not identified in the 2009 General Rate Case, as projects to remediate or replace MTBE-contaminated plant are completed, the Company will book a reclassification from other long-term liabilities to CIAC and adjust rate base during the next GRC. The CPUC's adopted rules would require all contamination proceeds to be used first to pay transactional expenses, then to make ratepayers whole for costs to ensure the water system complies with the CPUC's water quality standards. The rules allow for a risk-based consideration of proceeds which exceed the costs of the remediation described above and may result in some sharing of excess, or "net" proceeds. Because treatment or replacement of Cal Water's MTBE contaminated wells will occur over a number of years, and because litigation continues with remaining defendants, a final disposition of Cal Water's memorandum account will occur at an unknown future date. Cal Water will continue to monitor proceeds and remediation and will report to the CPUC in its next GRC. Because of uncertainty surrounding eventual litigation proceeds, remediation capital and operating costs, and the eventual ratemaking treatment of "net proceeds" as defined by the CPUC, Cal Water cannot predict the future disposition of its partial MTBE settlement proceeds at this time.

Table of Contents

Service Line Insurance Billing

As a consequence of D.07-12-055 which resolved Cal Water's 2006 GRC, Cal Water was required to demonstrate that its non-regulated Extended Service Protection (ESP) business or its successor complies with CPUC rules. Cal Water made an administrative compliance filing in 2008 which was rejected. Cal Water subsequently filed A.08-05-019 requesting Commission confirmation that the interaction between Cal Water, CWS Utility Services, and Home Service USA complied with all applicable rules. During the proceeding, the CPUC established a memorandum account to record Cal Water's revenues and expenses related to the non-regulated service line insurance business. The application is being processed in 2011 and 2012 after the CPUC adopted comprehensive rules for the relationships between regulated utilities and their unregulated affiliates and the rules for offering non-tariffed products and services. These rules went into effect on June 30, 2011 as a result of D.10-10-019. The CPUC's ratepayer advocate testified that Cal Water's customers should receive some of the proceeds from the sale of the non-regulated ESP business as well as other program revenues. While Cal Water challenged these claims and presented its own testimony, the parties were able to reach a settlement on all issues in the case. The proposed settlement, which was filed in October 2011, describes the accounting and revenue sharing applicable to the non-regulated service line business after June 30, 2011 and proposes a monetary settlement of \$2.1 million to ratepayers to resolve all issues related to non-regulated service line business activity from 2007 through June 30, 2011. The settlement is still subject to approval by the CPUC. Cal Water anticipates that the CPUC will approve the settlement in the second quarter of 2012. A \$2.1 million regulatory liability and reduction to revenues was recorded during the third quarter of 2011. The amount is expected to be refunded on ratepayer bills over a 12-month period.

2012 Expense Offset filings

In 2012, Cal Water filed advice letters to offset increased purchased water and pump tax rates in six of its regulated districts totaling \$5.7 million in annual revenue. Expense offsets are dollar-for-dollar increases in revenue to match increased expenses and interact with the WRAM and MCBA mechanisms so that net operating income is not affected by an offset increase.

In the future, Cal Water plans to file advice letters to offset expected increases in purchased water and pump tax charges in some districts. Cal Water cannot predict the exact timing or dollar amount of the changes.

2012 Ratebase Offset filings

In 2012, Cal Water filed an advice letter to offset several infrastructure improvement projects in four districts totaling \$0.7 million in annual revenue. For these offsets, Cal Water also filed 12 month surcredits to the customers to account for the use of internal labor to complete the flat to meter projects. These surcredits total \$0.5 million. Companies are allowed to file rate base offsets to increase revenues for construction projects authorized in GRCs when the plant is placed in service. The project for this filing was authorized in the 2009 GRC. The remaining \$71.7 million of advice letter projects are scheduled to be completed during 2012 and 2013.

LIQUIDITY

Cash flow from Operations

Cash flow from operations for the first quarter of 2012 was \$22.9 million compared to \$24.6 million for the same period of 2011. In general, cash flow from operations is primarily generated by net income, non-cash expense for depreciation and amortization, deferred income taxes, regulatory liabilities, and other current liabilities. Cash generated by operations varies during the year due to customer billings, timing of contributions to our benefit plans, and timing of estimated tax payments.

During the first quarter of 2012 we made contributions of \$6.0 million to our pension and retiree health care plans. During the first quarter of 2011, we did not make contributions to our pension and retiree health care plans. During the first quarter of 2011, we paid \$2.1 million of property taxes and did not pay any property taxes during the first quarter of 2012.

The water business is seasonal. Billed revenue is lower in the cool, wet winter months when less water is used compared to the warm, dry summer months when water use is highest. This seasonality results in the possible need for short-term borrowings under the bank lines of credit in the event cash is not available to cover operating and capital costs during the winter period. The increase in cash flows during the summer allows short-term borrowings to be paid down. Customer water usage can be lower than normal in years when more than normal precipitation falls in our service areas or temperatures are lower than normal, especially in the summer months. The reduction in water usage reduces cash flows from operations and increases the need for short-term bank borrowings. In addition, short-term borrowings are used to finance capital expenditures until long-term financing is arranged.

Investing Activities

During the first quarter of 2012 and 2011, we used \$28.7 million and \$24.5 million, respectively, of cash for both company-funded and developer-funded capital expenditures. For 2012, our capital budget is approximately \$100 to \$125 million. Annual expenditures fluctuate each year due to the availability of construction resources and our ability to obtain construction permits in a timely manner.

[Table of Contents](#)

[Financing Activities](#)

During the first quarter of 2012, there were no equity or debt offerings; however, we borrowed \$5.7 million on our unsecured revolving credit facilities.

The undercollected net WRAM and MCBA receivable balances were \$50.7 million as of March 31, 2012 and \$49.6 million as of December 31, 2011, respectively. The CPUC shortened the amortization periods for undercollected net WRAM and MCBA balances such that most balances will be collected within 18-month. This change is expected to improve cash flows during 2012. The undercollected balances were primarily financed by Cal Water and negatively affected cash flows for the three months ended March 31, 2012. Cal Water used short-term and long-term financing arrangements to meet operational cash requirements. Interest on the undercollected balances, the interest recoverable from ratepayers, is limited to the current 90-day commercial paper rates which is significantly lower than Cal Water's short and long-term financing rates.

[Short-Term and Long-Term Debt](#)

Short-term liquidity is provided by our unsecured revolving credit facilities, which were amended and replaced on June 29, 2011, and internally generated funds. Long-term financing is accomplished through the use of both debt and equity. As of March 31, 2012, there were short-term borrowings of \$50.8 million outstanding on the unsecured revolving credit facilities compared to \$47.1 million as of December 31, 2011.

Given our ability to access our lines of credit on a daily basis, cash balances are managed to levels required for daily cash needs and excess cash is invested in short-term or cash equivalent instruments. Minimal operating levels of cash are maintained for Washington Water, New Mexico Water, and Hawaii Water.

Both short-term credit agreements contain affirmative and negative covenants and events of default customary for credit facilities of this type including, among other things, limitations and prohibitions relating to additional indebtedness, liens, mergers, and asset sales. Also, these unsecured credit agreements contain financial covenants governing the Company and its subsidiaries' consolidated total capitalization ratio not to exceed 66.7% and an interest coverage ratio of three or more. As of March 31, 2012, the Company's total capitalization ratio was 45.2% (trade payable is included as debt for this calculation) and interest ratio was four and three fourths. In summary, we have met all of the covenant requirements and are eligible to use the full amounts of these credit agreements. As of March 31, 2012, we have met all of the covenant requirements and are eligible to use the full amount of the commitment.

Bond principal and other long-term debt payments were \$2.4 million during the first quarter of 2012 compared to \$0.2 million during the first quarter of 2011.

Long-term financing, which includes senior notes, other debt securities, and common stock, has typically been used to replace short-term borrowings and fund capital expenditures. Internally generated funds, after making dividend payments, provide positive cash flow, but have not been at a level to meet the needs of our capital expenditure requirements. Management expects this trend to continue given our capital expenditures plan for the next five years. Some capital expenditures are funded by payments received from developers for contributions in aid of construction or advances for construction. Funds received for contributions in aid of construction are non-refundable, whereas funds classified as advances in construction are refundable. Management believes long-term financing is available to meet our cash flow needs through issuances in both debt and equity instruments.

On September 23, 2010, the CPUC authorized Cal Water to issue \$350 million of debt and common stock to finance capital projects and operations. During the first quarter of 2012, we utilized cash generated from operations, borrowings on the unsecured revolving credit facilities, and the first mortgage bond offerings. We did not issue any significant common stock in 2011. In future periods, management anticipates funding our capital needs through a relatively balanced approach between long term debt and equity.

[Table of Contents](#)

[Dividends, Book Value and Shareholders](#)

The first quarter of 2012 common stock dividend of \$0.1575 per share was paid on February 17, 2012, compared to a quarterly dividend in the first quarter of 2011 of \$0.15375. This was our 268th consecutive quarterly dividend. Annualized, the 2012 dividend rate is \$0.63 per common share, compared to \$0.615 in 2011. For the full year 2011, the payout ratio was 68% of net income. On a long-term basis, our goal is to achieve a dividend payout ratio of 60% of net income accomplished through future earnings growth.

At its April 25, 2012 meeting, the Board declared the second quarter dividend of \$0.1575 per share payable on May 18, 2012, to stockholders of record on May 7, 2012. This was our 269th consecutive quarterly dividend.

[2012 Financing Plan](#)

We intend to fund our capital needs in future periods through a relatively balanced approach between long-term debt and equity. The Company and Cal Water have a three-year syndicated unsecured revolving line of credit of \$100 million and \$300 million, respectively for short-term borrowings. As of March 31, 2012, the Company's availability on these unsecured revolving lines of credit was \$349.2 million.

[Book Value and Stockholders of Record](#)

Book value per common share was \$10.61 at March 31, 2012 compared to \$10.76 at December 31, 2011.

There were approximately 2,399 stockholders of record for our common stock as of May 1, 2012.

[Utility Plant Expenditures](#)

During the first quarter of 2012, capital expenditures totaled \$28.7 million for company-funded and developer-funded projects. The planned 2012 company-funded capital expenditure budget is approximately \$120 to \$125 million. The actual amount may vary from the budget number due to timing of actual payments related to current year and prior year projects. We do not control third-party-funded capital expenditures and therefore are unable to estimate the amount of such projects for 2012.

At March 31, 2012, construction work in progress was \$123.2 million compared to \$107.2 million at March 31, 2011. Work in progress includes projects that are under

construction but not yet complete and placed in service.

WATER SUPPLY

Our source of supply varies among our operating districts. Certain districts obtain all of their supply from wells; some districts purchase all of their supply from wholesale suppliers; and other districts obtain supply from a combination of wells and wholesale suppliers. A small portion of supply comes from surface sources and is processed through Company-owned water treatment plants. To the best of management's knowledge, we are meeting water quality, environmental, and other regulatory standards for all company-owned systems.

California's normal weather pattern yields little precipitation between mid-spring and mid-fall. The Washington Water service areas receive precipitation in all seasons, with the heaviest amounts during the winter. New Mexico Water's rainfall is heaviest in the summer monsoon season. Hawaii Water receives precipitation throughout the year, with the largest amounts in the winter months. Water usage in all service areas is highest during the warm and dry summers and declines in the cool winter months. Rain and snow during the winter months replenish underground water aquifers and fill reservoirs, providing the water supply for subsequent delivery to customers. As of April 1, 2012, the State of California snowpack water content and rainfall accumulation during the 2011 — 2012 water year is 53% of normal (per the California Department of Water Resources, Northern Sierra Precipitation Accumulation report). Precipitation during the three months ended March 31, 2012 was below average. Management believes that supply pumped from underground aquifers and purchased from wholesale suppliers will be adequate to meet customer demand during 2012 and beyond. Long-term water supply plans are developed for each of our districts to help assure an adequate water supply under various operating and supply conditions. Some districts have unique challenges in meeting water quality standards, but management believes that supplies will meet current standards using current treatment processes.

CONTRACTUAL OBLIGATIONS

During the three-months ended March 31, 2012, there were no material changes in contractual obligations outside the normal course of business.

Item 3.

QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

We do not hold, trade in or issue derivative financial instruments and therefore are not exposed to risks these instruments present. Our market risk to interest rate exposure is limited because the cost of long-term financing and short-term bank borrowings, including interest costs, is covered in consumer water rates as approved by the commissions. We do not have foreign operations; therefore, we do not have a foreign currency exchange risk. Our business is sensitive to commodity prices and is most affected by changes in purchased water and purchased power costs.

Historically, the CPUC's balancing account or offsetable expense procedures allowed for increases in purchased water and purchased power costs to be passed on to consumers. Traditionally, a significant percentage of our net income and cash flows comes from California regulated operations; therefore the CPUC's actions have a significant impact on our business. See Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies - Expense Balancing and Memorandum Accounts" and "Regulatory Matters".

Item 4.

CONTROLS AND PROCEDURES

(a) *Evaluation of Disclosure Controls and Procedures*

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our CEO and CFO, as appropriate, to allow for timely decisions regarding required disclosure.

In designing and evaluating the disclosure controls and procedures, management recognized any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Accordingly, our disclosure controls and procedures have been designed to provide reasonable assurance of achieving their objectives.

Our management, with the participation of our CEO and our CFO, evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2012. Based on that evaluation, we concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

(b) *Changes to Internal Control Over Financial Reporting*

There was no change in our internal control over financial reporting that occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1.

LEGAL PROCEEDINGS

Information with respect to this item may be found under the subheading "Contingencies" in Note 9 to the Unaudited Condensed Consolidated Financial Statements in Item 1 of Part 1 hereof, which is incorporated herein by reference.

**CERTIFICATION OF THE CHIEF EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF
THE SARBANES-OXLEY ACT OF 2002**

I, Peter C. Nelson, certify that:

1. I have reviewed this quarterly report on Form 10-Q for the quarter ended March 31, 2012, of California Water Service Group;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
