**Item 8.01. Other Events.**

On May 9, 2023, the California Public Utilities Commission (the "CPUC") issued a proposed decision (the "PD") in Application 21-05-001, et. al., addressing the cost of capital Application for California Water Service Company, the Registrant's California regulated utility subsidiary ("Cal Water"). If the PD is adopted as proposed, Cal Water would be authorized a return on equity of 9.05%, a cost of debt of 4.23%, and a capital structure weighted 53.4% equity/46.6% debt. In addition, the PD would reauthorize the cost of capital adjustment mechanism for 2023 and 2024 and rates would become effective upon filing an advice letter within 30 days of the date of a final decision. In its cost of capital application, Cal Water requested a return on equity of 10.35%, a cost of debt of 4.23%, and a capital structure weighted 53.4% equity/46.6% debt ratio.

The PD can first appear on the agenda for the CPUC's voting meeting on June 8, 2023. The CPUC can approve the PD, modify it, or reject it. It may also hold the decision to a future meeting.

The information furnished pursuant to Item 8.01 of this Current Report shall not be deemed "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such a filing.
